

Delivering The Power To Grow

Comprehensive Landscape Management Services

Gachina understands that your property's landscape is one of the most important assets requiring expert care, maintenance and ongoing enhancement. From year-round maintenance to seasonal color and tree care, Gachina delivers customers the power to grow through our comprehensive landscape management services.

For the past two decades Gachina's team of landscape experts have been managing some of the San Francisco Bay Area's most prestigious retail centers, corporate campuses, public spaces and homeowner associations. Gachina ensures property owners that the value of their landscape investment appreciates through our proper care, maintenance and enhancements. Our award winning attention to detail enables our customers to create natural and beautiful environments that leave lasting impressions.

Comprehensive Landscape Services

Gachina offers a broad range of landscape services that can be customized to meet customers needs. Services include:

Landscape Maintenance & Enhancement

Gachina's landscape maintenance and enhancement programs literally start from the ground up, providing year-round solutions to your landscaping needs. Our team not only provides the top-notch mowing, edging, pruning, and clean-up services you have come to expect, but Gachina goes the extra mile.

Dedicated to providing plant healthcare programs and scheduled maintenance that your lawns, shrubs and trees require, Gachina's on-going maintenance programs include; monitoring soil composition, periodic aerating of turf areas, fertilization and the systematic control of weeds and insects through environmentally sound methods. Our maintenance services enhance the long-term beauty of your property allowing your grounds and open spaces to be clean and inviting to visitors.

Landscape Installations

Involvement with landscape installation begins with the careful planning and design by Gachina Landscape's professionals. Proper recommendations and selection of soil, turf, plants, trees and irrigation systems that fit your project enable Gachina customers to benefit from decades of horticulture care experience. Keeping project installations on-schedule and within budget.

Irrigation Management & Water Conservation

At Gachina we understand that water conservation in the State of California is the cornerstone to a successful landscape project. Our certified irrigation technicians design, build, convert and install state of the art automatic watering systems that are vital for a luscious and healthy landscape.

In addition, Gachina has staff of certified water management experts, trained in the efficient use of water resources. Our irrigation management programs enable customers to conserve California's precious resources. Lowering water waste and reducing overall maintenance costs through effective conservation.

Seasonal Flower Design and Planting

Our staff of professionals has extensive experience in designing seasonal color landscapes. Gachina seasonal plantings are scheduled to achieve maximum impact during the season.

Tree Management

As part of our portfolio of landscape services Gachina offers complete tree care that protect and preserve the health and safety of young and mature growth trees. Tree planting, pruning, stump grinding, removal and replacement are all available through Gachina landscape services.

Plant Health Care

Gachina landscape offers comprehensive plant health care services to test, evaluate and diagnose plant and soil conditions within a customer's landscape. Certified plant health care specialists replenish and balance soil nutrients while applying the proper fertilization to shrubs and plants.
